# Open the eyes of your home... to natural light!

The atmosphere in your home is determined by the amount of light inside and the view to the outside. We can show you how to get the best results in your home...improving the appearance...increasing the value.

## Beautiful Garden Bay Window.

Our Garden Bay Window was designed specifically for the plant lovers to fulfill the desire of many Australians to have more air and sunshine for their indoor plants.

Copied from the popular European window flower box projecting out from the walls of the room it creates space, giving the room an airier, bigger appearance.

Many existing windows face uninteresting vistas, side walls and back fences.

The Garden Bay Window will brighten up such rooms and add the colour of your indoor plants. It lends itself beautifully to any type of house, old or new and comes in a range of colours and glazing and is made to suit any opening size.

## Full length Bay Windows.

These extended windows to the floor add charm and character to any home.

Available in an extensive range of colours and styles to blend with any house, the Full Length Bay Window can improve the appearance and increase the value of your home, particularly as front feature windows.

Clear, tinted or colonial glazing styles are popular.

**CALL US NOW! For obligation free discussion on your window project!**

## Window Replacement.

If you are sick of maintaining your old tired windows then we can replace them with new timber or maintenance free Aluminium. Range of colours and styles to suit every home whether timber, brick, stone or fibro.

## Window Enlargement.

Bored with gloomy rooms? The transformation inside and out can be dramatic by enlarging in width or taking down to the floor.

You will be surprised at just how inexpensive such work is and how it can change your living environment.

The front feature rooms determine the external character of your home - start with these and see how the appearance improves and the value increases.

## Window to Door Conversion.

Do you have a useless area in your home? ... Need a door instead of a window - conversion is simple and inexpensive and oh, what a difference it can make. Get rid of the frustration and open up your home with a Door Conversion out onto the patio, into the garden or garage.

## Cut out of Solid Wall.

Come to a dead end, dark hall ways and rooms are unattractive and gloomy.

We can open up those dark spots and bring in the light with a window or a door way.

Our experienced tradespeople can cut the required opening, ensuring correct structural standards are followed and fit windows or doors to your requirements.

## Porch Enclosure.

Many homes have open verandahs which can be inexpensively converted into valuable living space - a cosy sunroom, children's playroom or music room.

Or perhaps replace those old, rotting timber frames in your front porch area ...

Our qualified consultant can advise the many alternatives available.

- Our prompt, no fuss, no mess installation by experienced, qualified installers, together with our exclusive 5 YEAR WARRANTY has won many friends.
